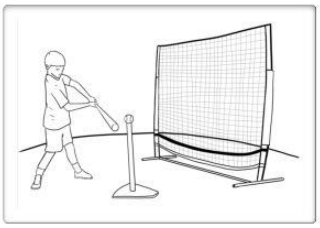
Advanced Focus Balls

Hitters of all ages can benefit from using the new Advanced Focus Balls from V-Flex Sports. This ball generates an incredible focal point on the ball, making it easier to hit harder. Players that use this ball see significant increases in their exit velocities and younger T-ballers see a big increase in bat to ball contact. A new era in Tee work has arrived!

V-Flex offers a Safety Tee ball for ages 8 and under, a high-quality baseball for high school and college players and an 11' and 12" softball for girls of all ages. To use, simply place the ball on the batting tee at the desired height and turn it in a direction where the focal point can be clearly seen. There are up the middle line drive options, opposite field and fly ball positions, as well as slapping options for softball slappers. We recommend changing the angles of the focal point to ensure the hitter is hitting the ball to all fields during a training session.


These balls are specifically designed to be used for batting tee work. The embossed design is engineered to withstand hundreds of impacts before fading so long as they are hit from a stationary position. Enjoy your tee work like never before and get the results you work so hard to achieve.
